

BlockAi – The AI Layer for Smarter Web3 Interaction

Empowering retail crypto traders and Web3-native users with intelligent, privacy-preserving AI tools that transform how you interact with decentralized ecosystems. BlockAi is your co-pilot for navigating the complexity of modern crypto markets.

The Problem: Critical Challenges in Crypto Trading

The crypto landscape has evolved into a maze of fragmented data, unreliable sources, and overwhelming complexity. Retail traders face unprecedented challenges in making informed decisions across multi-chain environments.

Current solutions fall short — offering only surface-level analytics while exposing users to security risks that contradict Web3's core principles of privacy and decentralization.

Market Complexity Overload

Rapidly evolving DeFi protocols and multi-chain ecosystems create fragmented data that overwhelms retail investors, making real-time monitoring nearly impossible.

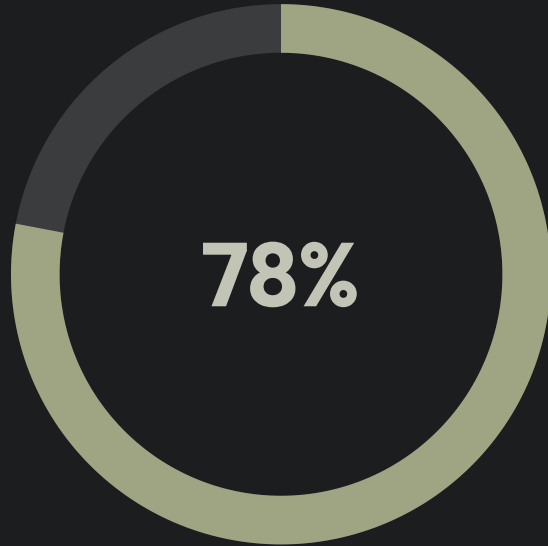

Lack of Intelligent Tools

Existing platforms provide only surface-level analytics from scattered sources, leaving traders without deep, personalized AI-driven insights.

Misinformation Crisis

Heavy reliance on unverified news and social media leads to poor investment choices driven by hype cycles and rumors.

More Than Just Challenges — It's Costing You

Data Exposure Risk

Centralized analytics tools expose sensitive user data to hacking and censorship

Underserved Users

Global crypto users lacking smart, context-aware assistance

Adaptive AI Assistants

Current tools cannot learn from behavior or adapt to market trends

The absence of self-learning AI assistants means traders miss opportunities daily. Without dynamic adaptation to user behavior and market shifts, current tools deliver generic insights when you need precision and context.

Introducing BlockAi: Your AI-Powered Web3 Co-Pilot

BlockAi transforms Web3 interaction through intelligent automation, conversational simplicity, and real-time alpha discovery. Built for traders who demand more than basic analytics.

AI Chat Interface

Natural-language assistant — ask questions, get insights, execute actions with zero complexity

Wallet Monitoring

Track activity across chains with portfolio summaries and strategic movement alerts

Token Insights

Access on-chain metrics, sentiment analysis, and predictive trends instantly

Powerful Features That Set Us Apart

On-Chain Alpha Engine

Receive real-time alerts for promising airdrops, points systems, yield farms, and early-stage DeFi opportunities before the crowd discovers them.

Seamless Interactions

Integrated with DEXs and bridges — enabling in-chat swaps, bridging, and farming without leaving the conversation.

Custom Notifications

AI-generated alerts based on your behavior and market shifts

Gamified Rewards

Earn points and early access to new protocols

Privacy First

Built with decentralization principles

The BlockAi Solution: Six Pillars of Excellence

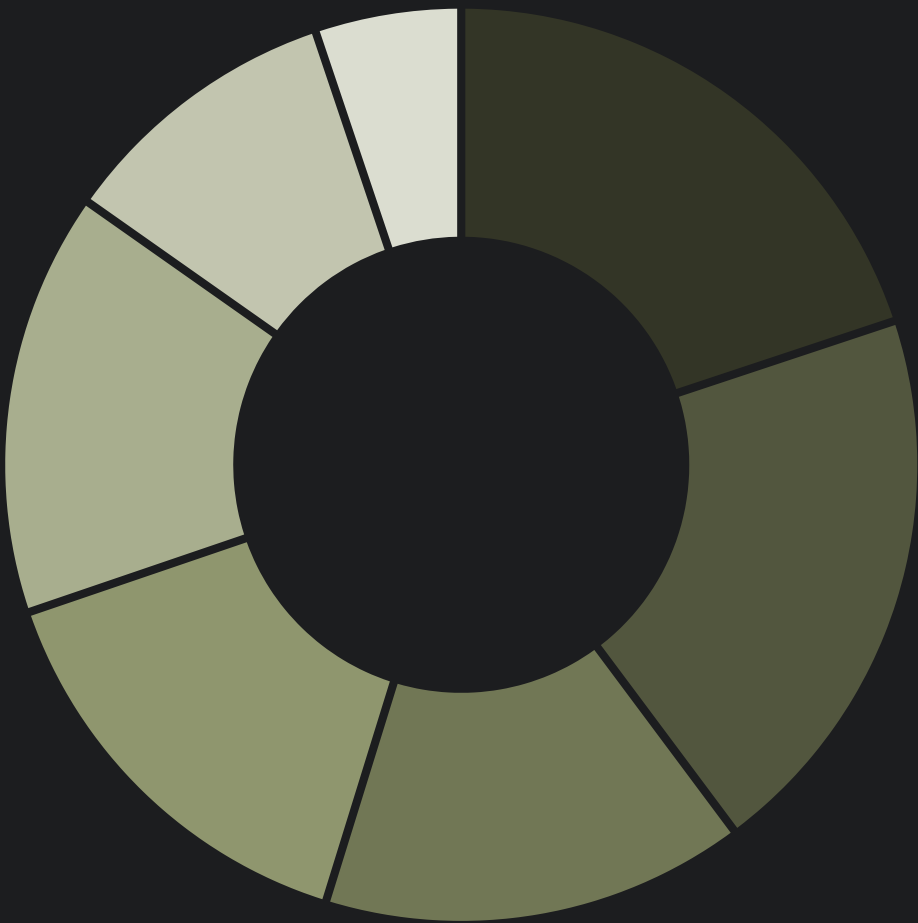

BlockAi delivers real-time analytics, predictions, and actionable recommendations tailored to each user. Our conversational interface eliminates the learning curve — interact via chat to explore tokens, execute transactions, or access AI insights.

With unified access to wallets, on-chain data, and DeFi tools in one ecosystem, BlockAi automatically identifies high-potential opportunities. Launching first on Telegram, we're expanding to Discord and Web platforms for maximum reach.

BLOCKAI Tokenomics: Built for Sustainability

The BLOCKAI token powers our ecosystem — enabling premium AI features, staking, governance, and community growth. Total supply: **1 Billion tokens** distributed strategically across stakeholders.

01

Community Rewards (15%)

150M tokens for engagement, quests, and ecosystem activities over 12 months

02

Airdrop Campaign (15%)

150M tokens for marketing and user acquisition with immediate unlock

03

Liquidity & Exchange (20%)

200M tokens fully available at TGE for deep liquidity provisioning

04

Team Alignment (20%)

200M tokens with 12-month cliff, fully vested by 24 months

Massive Market Opportunity: Crypto Meets AI

\$800B+ AI Market by 2030

Artificial intelligence is reshaping digital experiences, yet the crypto industry remains underserved by intelligent, real-time tools. With 420 million global crypto users navigating decentralized ecosystems without reliable assistance, the opportunity is unprecedented.

420M+

Global Crypto Users

Underserved by smart, data-driven
AI assistants

\$800B+

AI Market Projection

Massive growth potential by 2030

No crypto-native assistant
simplifies real-time on-chain
decisions

The Gap: Most AI tools in crypto are static dashboards or simplistic bots. BlockAi fills this gap — building the AI layer for the next generation of Web3 interaction.

Business Model & Roadmap to Success

Revenue Streams

- **Subscription Plans:** Free tier and premium offerings with advanced analytics
- **B2B White-Labeling:** Licensing technology to exchanges and DeFi platforms
- **Token Utility:** BLOCKAI for features, staking rewards, governance
- **Affiliate Programs:** Partnerships and cross-platform integrations
- **Future Monetization:** AI trading signals, NFT integrations

Strategic Roadmap

- **Q3 2025:** Seed funding & team expansion
- **Q4 2025:** MVP launch with chatbot and rewards
- **Q1 2026:** DEX & bridge integration + premium subscriptions
- **Q2 2026:** Multi-platform expansion (Telegram, Discord, Web)
- **Q4 2026:** Strategic partnerships & B2B licensing
- **2027+:** Global expansion & ecosystem growth

1

Early Mover Advantage

First to market in AI-powered on-chain assistance

2

Dual Hypergrowth Sectors

Operating at the convergence of AI and Web3

3

Scalable Architecture

From chat to multi-platform integration

Join Us in Shaping the Future of Web3 x AI

BlockAi isn't just a product — it's the foundation of an AI-native Web3 future, where every user can understand and act on blockchain data effortlessly. We're building the next generation of Web3 intelligence with a visionary team that combines deep expertise in AI, blockchain, and growth.

Visionary Team

Experts in AI, blockchain, and exponential growth

Market Leadership

First mover in AI-powered on-chain assistance

Proven Scalability

Chat interfaces to enterprise integration

Let's Build Together

Partner with BlockAi to revolutionize how millions interact with Web3. The convergence of AI and blockchain represents the most significant opportunity in digital innovation today.
